NEW-ROAD, REGENT'S-PARK.

RADIATING REGISTER STOVES, by the original Manufacturer, HARRIS WATSON, 12, Wilson-street, Finsbury-square, who has constantly on view a large and elegant assortment, suited to every description of building, from the cottage to the mansion. Stoves made to drawings and designs furnished. Old stoves cleaned and re-burnished.

DEANE, DRAY, & DEANE'S PATENT FIRE LUMP STOVE, adapted to the drawing-room, dining-room, and library, has three main qualifications which entitle it to public favour, and which have already secured for it the public preference. First, it is so cheap that the cost of a patent Fire Lump, together with a chimney-piece, does not exceed the price of a common stove by itself; second, its capacity of radiating heat is greater than that of any other stove in existence; and, lastly, its economy of fuel is so considerable, that where it is adopted the expense of coal will be reduced by one half. The fresh, rich, and healthy heat of the Patent Fire Lump Stove are all in one. It has no bottom grating, and the only metallic substance about it which comes in contact with the fire is the bars, while the fire part of the stove is so constructed that, as the fuel burns, it drops to a centre. The Patent Fire Lump Stove has the unqualified recommendation of the first architects of the day.
